AWARE ID™

Unlock the possibilities of adaptive authentication.

Authentication Reimagined

The authentication company gets you to market faster with **revolutionary** authentication, validation and security—on demand.

Welcome to the future of authentication. Welcome to AwareID™.

In our connected world, security is absolutely critical. Until AwareID, onboarding and security solutions have been time-consuming, expensive, confusing—or all three. As a leader in adaptive authentication, we're revolutionizing the way companies face everyday business problems. **AwareID is the only authentication platform of its kind in the marketplace**, and we're helping businesses reduce costs and time while keeping their enterprise and people secure.

WHY STOP AT ONBOARDING? AWAREID COMBINES AUTOMATION WITH TRUST SO YOU CAN CONTINUOUSLY AUTHENTICATE WHILE INCREASING EFFICIENCY AND LOWERING COSTS.

AwareID's cloud-based platform provides a functional offering from the start so your company gets to market faster and stays on the cutting-edge of adaptive authentication as it grows. In fact, AwareID onboards identities 4x faster and reduces 50% of the costs. Our best-in-class platform offers intuitive tools and unique solutions you won't find anywhere else.

Onboard Employees
4X Faster

Reduce 50%
of authentication costs

Authentication solutions that secure your enterprise.

Improve Identity Verification and Authentication Processes	Reduce Fraud and Identity Theft	Enhance Customer Experience & Increase Customer Base & Retention	Protect Overall Business (e.g., fraud reduction without added friction; access control)	Manage costs & become more competitive (e.g., optimize processes & headcount)

Internal Impact (Workforce)

External Impact (Customers)

Overall Impact (Shareholders)

A leading authentication provider for more than 25 years

AwareID leverages decades of biometric expertise and know-how from a trusted industry leader. Featuring proven authentication technology already relied upon by governments and countries around the world, AwareID's turnkey adaptive authentication is flexible, easy to implement and designed to meet your needs. As *the* authentication company, Aware is leading the convergence of identity, biometrics, AI and cybersecurity via an adaptive competitive methodology which senses and responds to changing market needs from emerging or unexpected new challenges.

COMPLIANT

> With AwareID you don't have to compromise the user experience in order to protect security and privacy. We're leveraging our 20+ years of implementation expertise and converging machine learning, artificial intelligence and biometrics to provide a next-generation authentication platform that aligns with the needs of organizations and protects identities against newly-emerging attack vectors. The platform's scalability and open environment allow it to continue to adapt to enterprise needs and the changing security landscape, giving our customers an edge they can't find anywhere else.

Applications

Onboarding/ Enrollment

Enroll individuals into an opt-in database through a convenient, easy-to-use mobile offering that can be accessed directly from a smartphone. Provide unmatched convenience for users without sacrificing security.

Verification/ Authentication

Verify the identity of an individual by comparing their biometric data with data captured during enrollment. Match a user-taken selfie image taken with a smartphone to the enrollment image already on file to verify and authenticate the individual.

Physical Access Control

Manage who has access to any physical location demanding a controlled, trackable and accountable entry/exit system. Available for time and attendance, visitor management, and comprehensive access control applications.

Digital Access Control

Control and provide access to highly senstive digital assets in a convenient, easy-to-use framework.

AWARE

AwareID: WORKFORCE MANAGEMENT

When you onboard a new employee with AwareID—on-site or remotely—you streamline more than just the hiring and authentication process. Our powerful solutions go far beyond standard eSignatures, instead offering groundbreaking biometrics that enable you to do everything more quickly and more securely. From systems access to timekeeping, AwareID is transforming the future of authentication and changing the way you do business.

AwareID: ACCESS CONTROL

Keeping physical and digital environments safe and secure has never been more important than it is today. From an employer, employee, or public perspective, the demand for top-level security begins and ends with undeniable authentication at every point of entry and exit. AwareID provides a controlled, trackable, and accountable system, supported by next-generation adaptive authentication. You won't find anything else like it in the industry.

AwareID: FINANCIAL SERVICES

AwareID provides a superior form of security in financial transactions and digital banking where fraud, theft, and unauthorized verification is prevalent and problematic. AwareID uses next-generation adaptable authentication to create security where it is vital—opening an account, making a transaction at an ATM, or using mobile or online banking as examples—while at the same time making it a desired frictionless experience for clients and customers. The only platform of its kind on the market, AwareID offers a far better alternative to traditional PIN and password methods because of its undeniable security and simplicity.

AwareID: EVERYWHERE

AwareID's adaptive authentication capability doesn't stop with HR, Access Control and Financial Services. Everywhere you need a superior, frictionless security solution to onboard and authenticate individuals our platform can help. Whether you're looking for functional from the start or the ability to configure to your exact specifications, unlock the possibilities with AwareID.

A new way of thinking. A better way of working.

How AwareID works:

Fill out form.

Take selfie.

And/Or

Speak phrase.

Capture ID.

AwareID confirms identity.*

Load app.

Capture face.

And/Or

Speak phrase.

Access account.*

ONBOARDING

AUTHENTICATION

Receive enrollment materials and details
necessary for future authentication.

Receive authentication score
per your thresholds.

+ Confirmation includes packaged information
necessary to perform additional reports
(e.g., Background Checks, AML Checks, eVerify, Etc.)

* OR: authorize a transaction, authorize access,
clock in/out for timekeeping, etc.

Supports multi-modal biometrics

Face

Voice

Iris

Fingerprint

Use one or more biometric modalities in series for multi-factor
authentication, or fused for a higher confidence score.
